Automatic Block Signals

Westward trains are superior to trains of the same class in the opposite direction.

A third class or extra train meeting a third class or extra train at Tehachapi under time table or train order superiority will consider the cut off switch directly in front of the telegraph office the point at which the inferior train will take siding.

ADDITIONAL STOPS

No. 102 will stop on signal at all stations to receive passengers for El Paso or east.

BAKERSFIELD AND MOJAVE SUBDIVISION

CLEARANCES.

Rule 83A will not apply at stations not telegraph offices, or where offices are closed for the day.

A train must not leave McKittrick or Coalinga without a clearance card (Form No. 2643).

REGISTERING.

At registering stations on single track, or at the end of double track when passing from single to double track, where trains are permitted to register as per Rule 83-B, conductors and telegraphers, or telephone operators, must comply with Rule 96, the same as at non-registering stations.

Helper engineers of Santa Fe freight trains on joint track, will accept from conductors, information on prescribed form, showing the numbers of all superior trains and stating that he has checked the register, and that all have arrived or departed as the case may be.

Exceptions.

Famoso	Trains to and from Branch and terminating only register.
Oil Junction	Trains to and from Branch and terminating only register.
Bakersfield	Eastward S. P. freight trains arriving register. Same to be telegraphed Kern Junction for duplicate register.
Kern Junction	Arrival and departure of Santa Fe passenger trains will be telegraphed Bakersfield for duplicate register.
Lancaster	Helpers only register.
Palmdale	Helpers only register.

Trains will Register by Form 2642 as follows:

Goshen Junction	25, 26.
Kern Junction	S. P. passenger trains and westward Santa Fe passenger trains.
Tehachapi	115, 116, 25, 26, 49, 102.

TRAIN AND AIR INSPECTION.

Freight trains descending grade will stop 5 minutes, or more, at following points, to allow trainmen to make thorough inspection of wheels and running gear of train in accordance with Rule 820:

Between Bakersfield and Mojave	Bealville, Woodford, Marcel, Warren. Eastward freight trains handling P. F. E cars will make stops at Larose and Fram in addition.
Between Mojave and Saugus	Ravenna, Lang.
McKittrick Branch	Between Mile Posts 357 and 358.
Between other points	After a continuous run of 40 miles.

That proper inspection or running gear may be made by trainmen, in accordance with Rule 824 and permit of their boarding train, freight trains must not exceed a speed of eight miles per hour when entering or pulling out of siding or leaving stations.

Rear end test between terminals as prescribed by Rule 17 of Rules and Regulations Governing Care and Operation of Air Brakes, etc., effective May 1, 1915, is required as follows:

For all trains wherever brake pipe has been parted.

Westward passenger trains stoping at Vincent and Tehachapi. Those not stopping must make running test.

Eastward passenger trains stopping at Tehachapi and Vincent. Those not stopping must make runing test.

Westward freight trains at Vincent, Summit and Tehachapi. Those making tests at Summit need not make it at Tehachapi unless stopped for other cause.

Eastward freight trains at Summit and Vincent.

In freight trains where helpers are coupled in rear of train, the last helper engineer to make coupling after brake pipe has been parted will sound one blast of the whistle for air test and the head engineer will, after charging up brake pipe, place his valve on lap and repeat the signal, rear brakeman not opening angle cock at rear end until brake pipe has been recharged and leading engineer has sounded signal for the test. Other engineers in train must not whistle off until air test has been made.

Conductor will report to Superintendent, by wire, any failure to properly control train by air brakes and will deliver to Car Inspector at first terminal list showing tonnage of each car in train. Car Inspector will add to list the piston travel of each car in train, as shown by test made before road engine is cut off, also result of three-minute test of all retainers. The list will then be forwarded to Superintendent by first mail.

"19" ORDER.

Within automatic block signal limits, between Fresno and Saugus, the note under Rule 211 is modified as follows:

Form "19" train order may be issued to restrict the superiority of a train, except that form 31 must be used—

(1) When orders are delivered at a non-telegraph or closed telegraph station. (See Rule 217.)

(2) When necessary to restrict a train which has been cleared or the engine of which has passed train order signal. (See Rule 219.)

(3) When issuing an order form "G," example 3.

(4) When giving any train right over all trains.

(5) When reducing a time order where necessary that dispatcher have signature of superior trains before completing order to an inferior train.

Operator will fill out clearance, designating thereon numbers of orders, repeat to dispatcher train and order numbers as they appear on clearance and obtain O. K. with time and Superintendent's initials, writing same before delivery in space provided for. Operator will retain carbon copy of clearance.

Dispatcher must write train and order numbers in his train order book as transmitted by operator from clearance, and must designate time clearance was made O. K., not transmitting O. K. unless operator repeats numbers of all orders to be delivered to the train to which clearance is addressed.

When "19" order restricting superiority is issued at station where superiority is restricted, train must be stopped by operator before delivery of order.

Conductor's and engineer's attention is called to the importance of approaching at a moderate rate of speed telegraph offices where orders are to be received and the necessity for carefully checking clearance to ascertain positively that it is properly addressed and that orders received are those called for by clearance.

Clearance outside automatic block signal limits must show numbers of all orders (both 31 and 19) and be O. K.'d by dispatcher same as within block signal limits.

AUTOMATIC SIGNALS.

When stopped by Block Signal (not Minute Blocks) on single track, trains will wait five minutes, then proceed as per Rule 504.

The following automatic block signals, governing trains entering and in yards, will be Minute Blocks:

Mojave: Nos. 3802, 3805, 3806, 3811.
Tehachapi: Nos. 3598, 3611.
Bakersfield: No. 3157.
Goshen Jct.: Nos. 2388, 2397.

If signals are at stop, wait one minute and then proceed under control.

At night if light is not burning, trains will be governed by position of arms.

When block signals indicating position of switches are yellow boarded, trains will reduce speed to six miles per hour through station limits until switches are passed.

Home signals No. 3805 and No. 3806 (minute blocks), just west of Oil and Water Columns, between main track and siding No. 1, Mojave yard, are placed "back to back." Signal No. 3805 governing westward trains is located on fireman's side, who will be on lookout for change in position of signal. Helper engines occupying main track must stand just west of these signals to prevent delay to westward trains.

Signal failures or irregularities (either action of arm or condition of light) will be reported to chief dispatcher from first open telegraph office.

INTERLOCKING SIGNAL TOWERS.

Fresno Tower No. 1.

(A. T. & S. F. Crossing 1.6 miles east of Fresno on Friant Branch):

For main track, one long blast of whistle.

To or from spur track, one long and one short blast of whistle.

Fresno Tower No. 2.

(A. T. & S. F. Crossing 1.5 miles east of Fresno on Porterville Branch):

For main track, one long blast of whistle.

Calwa Tower.

(A. T. & S. F. Crossing and end of double track 0.8 mile east of Calwa):

Eastward trains approaching end of double track will call for switch and derailer by one long, one short and one long blast of whistle.

Westward trains will sound one long blast of whistle for crossing and for double track.

Lower arm of signal located just east of crossing controls the admission of westward trains on to double track against the current of traffic.

Dwarf signal located between main tracks just west of tower controls eastward trains moving against the current of traffic.

Hanford Tower.

(A. T. S. F. Crossing 0.3 mile west of Hanford):

For main track, one long blast of whistle.

For crossing through side track, one long, one short and one long blast of whistle.

Tulare Tower.

(A. T. & S. F. Crossing 0.3 mile west of Tulare):

For main track, one long blast of whistle.

Kern Junction Tower.

(A. T. & S. F. Crossing and McKittrick Branch Jct. 0.7 mile east of Bakersfield):

For main track, one long blast of whistle.

For movement over crossing on side track, one long, one short and one long blast of whistle.

For movement between S. P. and A. T. & S. F. main line, one long and one short blast of whistle.

For movement between main track and transfer track, one short, one long and one short blast of whistle.

General.

For any movement against current of traffic on double track, sound one long and one short blast of whistle.

When a train which has been given the semaphore signal at any crossing does not wish to use crossing, one short and one long blast of whistle should be sounded for the information of the towerman.

SPEED TABLE.

This table is for the purpose of determining speed per mile and must in no way conflict with rules restricting speed of trains.

Miles per Hour	1 Mile in Min. Sec.	Miles per Hour	1 Mile in Min. Sec.	Miles per Hour	1 Mile in Min. Sec.	Miles per Hour	1 Mile in Min. Sec.
6	10	21	2.51	31	1.56	41	1.27
8	7.30	22	2.43	32	1.52	42	1.25
10	6	23	2.36	33	1.49	43	1.23
12	5	24	2.30	34	1.45	44	1.21
15	4	25	2.24	35	1.42	45	1.20
16	3.45	26	2.18	36	1.40	46	1.18
17	3.31	27	2.13	37	1.37	47	1.16

SPEED RESTRICTIONS—Continued.

Engines on passenger trains:	
Decapod	Freight Train Speed
Consolidation	Maximum speed allowed passgr. trains.
When meeting or passing on double track	20 miles per hour except where speed restrictions are less will be governed thereby.
Engines running light:	
8-wheel, 10-wheel, Mogul and Mikado	Passgr. Train Speed.
Consolidation type	20 miles per hour where freight trains are restricted to 18.
Fernando Helpers (2914) class	25 miles per hour where freight trains are restricted to 18.
Engines not above specified	Freight train speed.
Engines backing up:	
Consolidation, Decapod, Mikado and Mallet between Bakersfield and Saugus	15 miles per hour.
Consolidation and Mikado between Fresno and Bakersfield	20 miles per hour.
Fernando Helpers (2914 class) between Palmdale and Saugus	20 miles per hour.
All others (except Consolidation, Mallet and Mikado) over main track and from Kerman to Goshen Junction	25 miles per hour.
Over other branches	20 miles per hour except where speed restrictions are less, be governed thereby.
From West Wye switch to station at Goshen Junction (Coalinga Branch)	10 miles per hour.
Switch Engines (outside yards)	15 miles per hour.
Trains handling wrecker:	
Main line and from Goshen Junction to Kerman	25 miles per hour.
Over other branches	15 miles per hour except where freight train speed is less, be governed thereby.

YARDS.

Yards are established at the following stations:

Fresno
Bakersfield
Mojave
Goshen Jct.
Hanford
Porterville
Exeter
Coalinga
Armona
Hardwick

Rules 93 and D-93 are revised as follows:

''Within yard limits the main track may be used, protecting against first class trains.

All trains must approach yard limits and pass through yards under control.''

OVERHEAD STRUCTURES.

Less than 22 feet above top of rails.

BETWEEN FRESNO AND EXETER.

USE OF RETAINERS.

Pressure retaining valves on locomotive tenders must be used on all descending mountain grades.

All avaibable retainers will be used on passenger trains on grades as follows:

EASTWARD TRAINS:—From Cameron to Mojave.

WESTWARD TRAINS:—From Vincent to Harold.
From Tehachapi to Caliente.

On freight trains, retainers will be used on grades in accordance with Rule 54 of "Rules and Regulations Governing Air Brakes, Etc., effective May 1, 1915," as follows:

EASTWARD TRAINS:—From Cameron to Mojave.
From Vincent to Lang.

WESTWARD TRAINS:—From Vincent to Harold.
From Tehachapi to Caliente.
From McKittrick to Lokern.

Retainers will be used on other trains and under other conditions where in judgment of the engine and train crew it is deemed necessary to vary from the above rules.

Where retainers are used the rate of speed of freight trains on any grade of over one per cent (over 1%) will not exceed 25 miles per hour, and on grades of this character, MORE THAN FIVE MILES LONG, FOR THE FIRST FIVE MILES THE TIME CONSUMED IN TRAVELING ANY ONE MILE SHALL NOT BE LESS THAN THREE MINUTES.

The above maximum speed restriction will not affect the speed on heavier grades and other locations, where the maximum is now provided.

MISCELLANEOUS.

On single track in Block Signal limits, Rule 86, second paragraph, is modified as follows: An inferior train will clear the time of first-class trains in the same direction not less than ten (10) minutes.

Approaching tunnels, by day, when within 300 feet, headlight must be displayed and continued until tunnel is passed.

Headlights of helper engines when coupled into trains must be concealed.

At least two loaded steel underframe cars must be placed immediately ahead of Mallet engines that are engaged in shoving.

Trains entering siding will do so under control. Responsibility for collision is placed with entering train.

When in an engineer's judgment, track which is protected by slow order is safe for a higher rate of speed than is allowed by such slow order, engineer will notify the conductor, stating what speed he considers safe, and conductor will then send a message to Superintendent from first open telegraph office covering information.

Engines of freight trains must be cut off to take water.

At unprotected railroad grade crossings, trains approaching will sound one long blast of steam whistle at proper distance from crossing, while train is running, in accordance with Rule 14 (m). After train has stopped and before passing over such crossing, engineer will sound two short blasts of the steam whistle.

Whistle signal covered by Rule 14 (m) applies when train is running.

Following additional whistle signal is authorized:

Sound	Indication
One long blast (————)	When train is standing; apply air brakes from rear and for test. To be used when hand signals cannot be readily transmitted.

At Fresno, all trains from Friant and Sanger branches will stop at junctions of these branches when entering yard.

At Fresno, eastward trains entering yard will be governed by signals from herder as follows: Trains from east side green signal, trains from west side yellow signal.

At Goshen Junction westward trains on Visalia branch must stop at stop board located at east end just opposite cross-over from Visalia branch to main track.

At Goshen Junction, the end of the Visalia Branch main track, will be at the point east of the station where first cross-over enters into the Visalia track.

At Famoso, the end of the Porterville Branch main track will be at the point west of the station where the cross-over from the main track enters into the Porterville track.

That part of these tracks between the cross-overs and the stations will be used as sidings, and trains using same will conceal headlight and display markers in accordance with Rules 17 and 19.

At Visalia, all trains will stop at Santa Fe tracks, and will not pass over crossing without receiving proceed signal from flagman, who must precede them.

At Exeter, all eastward trains must stop at stop board at junction east leg of wye with Porterville Branch.

Engines coupled, and cars weighing over 155,000 pounds, must not be run over Bridge 288-B, near Orris.

At Bena engines must not go beyond a point 300 feet from switch into pit. Cars must be used in switching if necessary to go back of that point.

At Caliente, when taking siding, eastward trains will use siding next to main track and westward trains will use outside siding.

At Marcel and Bealville, all trains, except first class, will use back track and that part of track west of cross-over as siding, switches lined accordingly.

Middle track from cross-over to east switch will be known as middle siding and used by first-class trains; eastward first-class trains entering at cross-over.

Freight trains will not go to Cliff for passenger trains, unless can get into clear or so instructed by dispatcher.

At Rowen, trains taking siding will comply with the following:
First-class trains will use middle siding entering at first cross-over.
Eastward trains, except first class, will enter at extreme west switch.
Westward trains, except first class, will enter at extreme east switch.

All trains, except first class, will use middle siding only under flag protection unless instructed by train order that middle siding is clear, but will not use the same when first-class trains are due to meet there.
Siding between east switch and east cross-over is designated as east siding.
Siding between cross-over switches is designated as middle siding.
Siding between west cross-over and west switch is designated as west siding.
Inside cross-over switches will be lined for siding.
Trains using sidings will depart through cross-overs.

At Woodford track on north side of main track will be used as siding for trains in both directions. House track must not be used for setting out or storing of cars.

At Summit, the siding known as "Old Siding" will be kept for use by Train 342, in cutting out helpers. Long track south of main track will be used for siding by other trains, and trains using same will enter at the extreme west or east switches.

Spur tracks at following stations between Bakersfield and Mojave must not be used by Mallet or Decapod engines: Sivert, Gravel Pit Bena, Caliente, Bealville, Rowen, Cable and Turntable Tehachapi.

The maximum tonnage rating per operative brake of 115 Ms. on both east and west sides of Tehachapi Mountain and 120 Ms. eastward from Mojave to Saugus, must be strictly observed. Oil cars equipped with latest Westinghouse empty and loaded brake device will permit the handling of 150 Ms. per operative brake.

In movement of helper engines light down the Tehachapi, the number of engines to be coupled together is restricted to the following: Not more than three Mallets; five Consolidations; three Mallets and one Consolidation; two Mallets and two Consolidations; one Mallet and three Consolidations.

At Mojave, trains entering yard will be governed by the following signals:

WESTWARD TRAINS: Santa Fe by Hall Signal. Southern Pacific by Signal 3811 (minute block).

EASTWARD TRAINS: Signal 3802 (minute block).

When necessary to signal westward trains, Herder will use yellow signal for Southern Pacific trains and green signal for Santa Fe trains. For eastward trains, Herder will use yellow signal.

Freight trains will not enter until signal is given by Herder.

At Honby, back track will be used as siding by freight trains and switches are so set. When necessary for passenger trains to take siding at that point, they will use the inside track up to point of cross-over.

Helper engines between Tehachapi and Summit will be governed by following:

A. Operator at Tehachapi will have a staff, and will deliver same to eastward trains having helpers to return from Summit, except as provided in Sections D, E and F.

Conductors of trains stopping at Tehachapi and requiring staff will personally procure same and deliver to leading helper engineer, personally notifying engineer handling train that he has done so.

For trains authorized to register by Form 2642, having helpers to return from Summit, operator will deliver staff to leading helper engineer and will hand to conductor and all other engineers in train, a clearance on which is written "Staff to Engineer."

B. After receipt of staff train may proceed to Summit, keeping clear of superior trains, providing train has also been cleared as required by the rules and regulations of Operating Department.

C. After an engineer has in his possession the staff, his engine and all engines at Summit may return coupled to Tehachapi regardless of opposing trains except first class.

D. As section C provides that helpers are required to clear first-class trains the staff need not be delivered to first-class trains except when such trains have helper to cut out at Summit and there are no helpers at Summit with which it can couple. Helpers when waiting at Summit to clear first-class trains will not leave without ascertaining whether such first-class trains have helpers to couple in with them.

E. When it is desired to run two or more trains to Summit, before allowing helper of any to return, operator will upon instructions from dispatcher deliver to enginemen and conductors of all such trains, except the last, in place of staff, clearance on which is noted, "Staff at Tehachapi," provided operator has staff in his possession. Clearance so worded will be sufficient authority for trains to move to Summit as if staff had been received. To last train staff will be given. "Staff at Tehachapi" clearances do not authorize trains to return to Tehachapi. When train receives "Staff at Tehachapi" clearance and is passed at Tehachapi by another train having a helper, the train which is passed will not thereafter proceed without first returning to telegraph office and ascertaining whether the train passing has the staff. If the train passing is given the staff, the train which is passed cannot thereafter proceed until staff is returned, and conductor will personally surrender all clearances to operator.

F. Staff will not be delivered to trains which have no engines to return from Summit. When there is no helper to return from Summit, "Staff at Tehachapi" clearance will be delivered (except to first-class trains) provided the operator has staff in his possession.

G. On return to Tehachapi, engineer with staff will personally deliver it to operator without delay.

Trains moving on staff between Summit and Tehachapi will register at Tehachapi in following manner:

In first column: Staff.

Second column: Signals (None) and balance of information as required by register.

In registering out register on separate line in the usual manner.
